## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference MK/P089889PWO	FOR FURTHER A	THER ACTION See Form PCT/IPEA/416				
International application No. PCT/GB2004/000429	International filing date 03.02.2004	e (day/month/year)	Priority date (day/month/year) .03.02.2004			
International Patent Classification (IPC) or no INV. G06F9/44	ational classification and	IPC				
Applicant CORIZON LIMITED et al.						
1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.						
2. This REPORT consists of a total of	of 5 sheets, including	this cover sheet.				
3. This report is also accompanied b	y ANNEXES, compris	ing:	'			
a. $\boxtimes$ sent to the applicant and to	o the International Bure	eau) a total of 1 sheets	s, as follows:			
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).						
☐ sheets which supersed beyond the disclosure Supplemental Box.	le earlier sheets, but win the international ap	which this Authority consplication as filed, as ind	siders contain an amendment that goes licated in item 4 of Box No. I and the			
b.   (sent to the International Bissequence listing and/or tab Relating to Sequence Listing	les related thereto, in (	celectronic form only. a	er of electronic carrier(s)), containing a sindicated in the Supplemental Box ructions).			
		τ,				
4. This report contains indications rel	ating to the following i	tems:	•			
Box No. I Basis of the repo	ort					
☑ Box No. II Priority						
☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability						
☐ Box No. IV Lack of unity of i		-				
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
	Box No. VI Certain documents cited					
☐ Box No. VIII Certain observations on the international application						
Date of submission of the demand		Date of completion of th	is report			
01.12.2005		26.05.2006

# INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Ú

International application No. PCT/GB2004/000429

_						
_	Box No. I Basis of the repo	rt				
1	. With regard to the language, the filed, unless otherwise indicated	nis report is based on the international application in the language in which it was d under this item.				
	international search (un publication of the intern	nslations from the original language into the following language, translation furnished for the purposes of: der Rules 12.3 and 23.1(b)) ational application (under Rule 12.4) examination (under Rules 55.2 and/or 55.3)				
2	. With regard to the <b>elements</b> * o have been furnished to the rece report as "originally filed" and a	f the international application, this report is based on (replacement sheets which eiving Office in response to an invitation under Article 14 are referred to in this re not annexed to this report):				
	Description, Pages					
	1-95	as originally filed				
	Claims, Numbers					
	-129 as originally filed					
	Drawings, Sheets	•				
	1/69-58/69, 60/69-69/69	as originally filed				
	59/69	received on 05.12.2005 with letter of 01.12.2005				
	☐ a sequence listing and/or ar	ny related table(s) - see Supplemental Box Relating to Sequence Listing				
3.	The amendments have resulted in the cancellation of:  the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specify): any table(s) related to sequence listing (specify):					
	<ul> <li>□ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).</li> <li>□ the description, pages</li> <li>□ the claims, Nos.</li> <li>□ the drawings, sheets/figs</li> <li>□ the sequence listing (specify):</li> <li>□ any table(s) related to sequence listing (specify):</li> </ul>					
	* If item 4 applies, so	me or all of these sheets may be marked "supercoded "				

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2004/000429

_	Во	k No. II Priority		<u> </u>			
1.	<ul> <li>. ☑ This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:</li> <li>☑ copy of the earlier application whose priority has been claimed (Rule 66.7(a)).</li> <li>☐ translation of the earlier application whose priority has been claimed (Rule 66.7(b)).</li> </ul>						
2.		This report has been esta been found invalid (Rule 6 above is considered to be	94.I). INU:	s for the bl	ity had been claim Irposes of this rep	ned due to the fact that the priority clain port, the international filing date indicate	n has ed
3.	Add	itional observations, if nec	essary:	•		•	
		No. V Reasoned state licability; citations and e	ment und xplanatio	ler Article ns suppor	35(2) with regard	d to novelty, inventive step or indust	 rial
1.		ement	<u> </u>				
	Nov	elty (N)	Yes: No:	Claims Claims	1-129	•

		•					

The following defects in the form or contents of the international application have been noted:

Certain defects in the international application

see separate sheet

Box No. VII

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

#### 1 Documents

1.1 Reference is made to the following documents:
 D1: US 2003/079047 A1 (FITTS SEAN M ET AL) 24 April 2003 (2003-04-24)

## 2 Inventiveness of the independent claims, Article 33(3) PCT

- 2.1 The present application is regarding a method for creating a composite user interface from components of at least one source application (see claims 1, 97, 98, 110, said features are disclosed in document D1: page 2, right column, paragraphs 36-39), where a model of the user interface of the source application is created by the help of templates (claims 1, 17, 93 and 110, D1: page 1, lines 52-54 model the user interface of an application) and a model of the composite user interface is created from the needed source models (claims 17, 93 and 97 document D1: page 2, lines 4-19 to create a model composite application with models of components coming from already established services, in other word from existing applications).
- 2.2 The method defined in the independent claims differs from that disclosed in D1 in that:
- a model of the composite user interface is processed to generate rules for communication between the composite user interface and at least one source application.
- the composite user interface is monitored to obtain management data.
- it is possible to choose among predefined composite user interfaces.
- 2.3 The objective technical problem to be solved by the present invention may therefore be regarded as how to find out usage and communication rules between the composite user interface and the source applications.
- 2.4 The solution proposed by the present application is the following: a model is created

for the composite user interface and the model is analysed in all its parts constituted by flow items (models) representing the original source application to find out how the composite interface model(s) is(are) related with the source application(s) and eventually extract the necessary data and rules for the communication of the composite UI and the source applications. The analysis of the model so composed allows to identify weak or slow points of the composite user interface and when needed deleting models of non essential features. Creating a composite user interface with this method has the advantage of improving the usability of the user interface when more then one applications is needed at the same time without the difficulty of massive customizations, such method is not to be found in the prior art at hand and is considered to be inventive.

- On the light of the differences outlined in paragraph 2.2, the identified objective technical problem and the above described solution, the subject matter of the independent method claims 1, 17, 93, 97, 98 and 110 is considered to involve an inventive activity in the sense of Article 33(3) PCT.
- 2.6 Since claims 49, 50, 80, 96, 104, 105, 119 and 129 relate to an apparatus having only features that correspond to the steps of method claims 1, 17, 93, 97, 98 and 110 the considerations concerning claims 1, 17, 93, 97, 98 and 110 apply accordingly.
- 2.7 Since claims 48, 103 and 128 relate to a data carrier carrying computer program code for executing the steps of method claims 1, 98 and 110 the considerations concerning claims 1, 98 and 110 apply accordingly.

#### Re Item VII

### Certain defects in the international application

The general statement in the description on page 95 refers to the "spirit of the invention". When used to interpret the claims, it indicates that subject-matter for which protection is sought could differ from the subject-matter of the claims, thereby rendering the scope of the claims unclear (Article 6 PCT guidelines, C-III 4.3a).
